Skills

HTML	MongoDB	JQuery
CSS	Git/GitHub	React
Javascript	Bootstrap	API's

AboutMe

From the moment I produced "Hello World" in the console of my first application, I knew I was hooked on the the world of software development. it's offered an engaging challenge to continually learn and improve my skills in creating high-quality software and web pages. What started with a simple "Hello World" has become a full-fledged passion that only get more exciting as the years go by.

Projects

To Do List:

This is a web app that is using NPM libraries, such as express, body parser, and EJS for templating. The web app adds items and deletes them with a click of a button. New to do list can be created by adding a "/" and a name of your choice(this will be the list name.) HTML, CSS, JS [Project Code](#) [Live Project](#)

Dice Roll:

This is a dice roll web app, it's a dice roll on the go. The project uses Javascript to process the random output, with some HTML and CSS to help give the app some pop. HTML, CSS, JS [Project Code](#)

Journal:

This is a web page that allows a safe space for users to share their thoughts. This web page uses EJS for templating with some CSS and Javascript to display the proper pages. Give it a try just add "/compose" to the end of the URL to add a log [Project Code](#)

Drum Set:

This web app is an awesome drum set, press the buttons on the screen to play the instrument. This project contains HTML for formatting, CSS for style and photos, and finally Javascript for the brains and sounds. HTML, CSS, JS. [Project Code](#)

Websites:

This website was created for a local construction company using Wordpress. This website showcases heavy machinery, with contact form and SEO implementation. Wordpress [Website](#)

Newsletter Signup:

This web app is using the Mail Chimp API to register users to a database. We can then use that information to send out promotion/information. API, HTML, CSS, JS [Project Code](#)
